== Love Notes ==

Hey lovelies! There's definitely been some reminders lately that this time of year isn't the best time for everyone. Remember to be kind to yourself and don't beat yourself up too much ok? Sometimes you do everything right. Sometimes you do your best, you bust your ass, and then shit goes horribly wrong the last second. Whether it's a draft on something fan related, or getting to work on time, or

preparing a candid talk with someone or being careful driving on ice, and someone else hitting you from behind. Whatever it is-- life sometimes just does not cooperate with your expectations.

To top it off, that can be very hard if you've already been dealing with so much. It really can. It can seem like.. NOTHING goes right, and like everything is frustrating, and when your cup is already full of nonsense it just starts overflowing.

You know what the good news is? Your cup will slowly drain over time the kinder you are to yourself. Rest helps it drain, love helps it drain, comfort helps it drain so you can have more room for the next thing that happens. Right now it feels like too much because your body and your mind need a break, and you deserve a break. Winter time is normally meant for human beings and animals to hibernate! To recover with the seasons! But now we work all the time, and it can burn us out real fast. Take care of yourselves, take breaks, and if shit goes wrong, keep taking breaks, if you can, until it doesn't feel so hard anymore <3

I hope you all rest this week and have some self-care time off if you have it-- and if you don't, please be safe out there. Thinking of you.
